

Objective

Nora-alhuda Salam

I am a young woman looking for the development of my professional, academic and research skills, as I have qualifications, including a master's degree in electrical power, as well as a bachelor's degree in electrical engineering sciences.

Profile

Name : Nora-alhuda Salam

Brith : 1988

mobile : +9647802664737

Email : nooralhudaasalam849@gmail.com

languages : Arabic, English

Adress :Iraq, Dhi-Qar, Nasiriyah, Summer District, al-baladiat street

Education

- (MSc) of Power Systems Engineering, University of IAU, Isfahan, Iran 2022
- (BSc) of Electrical Engineering, Southern-Technical University, Basra, Iraq , 2013

Certification

- I holds a certificate of appreciation in occupational safety from the Engineers Syndicate , Dhi-Qar branch.
- I holds a certificate of appreciation in practicing work in the computers twice from the Vocational Training. Center in Dhi-Qar.

Work experiences

- I lectured at three laboratories in the Department of Industrial Engineering and Department of Computer Engineering, Electrical Circuits and Electronics at AlAYen University, from (Mar 2024 – to – now)
- I lectured at three laboratories in the Electricity Department at the Nasiriyah Technical Institute which are the Networks Laboratory, the Electronics, Laboratory, and the Computers Laboratory.
- worked as a volunteer teacher in the Electricity Department of the Nasiriyah Technical Institute.
- worked as an engineer in the Dhi-Qar Electricity Distribution Department. I also worked in the Sumer Electricity Maintenance Division.
- I worked on a project to build the municipal council building in Nasiriyah.
- Worked in the construction of a group of schools in the year 2013 .

Skills and ability

- I speak English perfectly
- I am good at working on a computer and solving some problems
- I am good at working on Microsoft Office
- programs, as well as engineering and electrical simulation programs

Hobbies and Activities

- Interested in developing engineering skills in the field of energy engineering, as he is constantly informed of modern technologies
- Keep up to date with computer technology and the Internet, as I always strive to develop myself in this field through courses and workshops.
- I seek to develop my skills in the field of training and development, especially with regard to electrical engineering and related fields.
